Don

Soft office sofa

Design: Intuit design team

While the lounge couch Ben serves as the focal point of the Social Zone, creating a comfortable space for colleagues to take a break from work, its larger counterpart, Don, elevates these breaks to a whole new level.

Don is as springy and as elegantly designed as Ben, but with a slightly deeper seating area, which adds a luxurious look and makes things more comfortable. Now everyone can get cosy and enjoy lying down, including four-legged members of the office.

Hektor

Playful modular seating system

Design: Lauri Visnapuu

Designed for dynamic public and shared spaces, Hektor is a modular seating system built around soft, hexagonal forms that invite movement, interaction and flexible use. The playful geometry allows organic, non-linear configurations that work equally well as flowing seating landscapes or as individual standalone seats.

Available in three module heights — from low poufs to higher-backed elements — Hektor enables zoning, visual variation and optional privacy within open environments. Its generously upholstered, soft construction makes it comfortable for extended waiting, informal meetings or relaxed social moments.

Kimi

Japandi-inspired, environmentally conscious sofa

Design: Argo Tamm

Inspired by Japandi style, Kimi brings balance, calm and conscious simplicity into the workplace. Its solid wood frame has a restrained, architectural presence, while adding warmth and natural character to the interior.

Thanks to its modular structure, Kimi can be configured into sofa compositions that suit a variety of spaces — from reception areas and lounges to quieter meeting and conversation zones. A practical movable armrest/table is available as an accessory: one side functions as a comfortable support to lean against, while the other provides a solid surface for a coffee cup, laptop or notebook. Decorative cushions can also be added to enhance back support and overall comfort.

Meeter Gap

Maintenance-smart modular sofa modules

Design: Argo Tamm

Developed as an evolution of Intuit's best-selling Meeter modular sofa series, Meeter Gap is designed to solve one of the most common yet costly challenges in high-traffic environments: difficult cleaning and ongoing maintenance.

Its key innovation lies in the structural gap between the seat cushion and backrest — a purposeful design detail that allows crumbs, debris and dirt to fall directly to the floor instead of accumulating inside the furniture. This significantly simplifies cleaning, speeds up maintenance routines and helps reduce long-term upkeep costs in spaces where furniture is used intensively every day.

Especially suited for dining areas, educational settings, waiting zones and other demanding public interiors, Meeter Gap combines the proven flexibility and modularity of the Meeter family with a practical operational advantage. The result is a seating solution that not only supports layout adaptability and user comfort, but also improves day-to-day efficiency for operators and facility managers.

With its modular logic, Node allows designers to build straight, curved and expansive seating landscapes that adapt to the scale and rhythm of each project. Available in two heights and multiple straight and rounded modules, Node supports everything from open social interaction to more defined spatial zoning.

Its larger form makes it particularly well suited for foyers, waiting areas, hospitality spaces, educational hubs and public interiors where furniture must do more than provide seating — it defines the atmosphere and creates purposeful gathering points.

Cosy niche sofa

Design: Lauri Visnapuu

When you combine the comfort of a home sofa with the convenience of an office sofa, you get Wander – a cosy niche sofa with high walls that provides visual separation, supports productivity, and can be easily moved around.

When complemented with an auxiliary desk, it serves as a functional work island. Equipped with castors, Wander moves with you. Modules arranged in a row are also suitable, for a café, for example.

Wander's soft back cushions are loose and adjustable. In keeping with circular economy design, Wander's coverings are durable and easy to replace, even on your own.

Sprout

Mobile plant divider

Design: Lauri Visnapuu

Adding greenery to a space enhances overall wellbeing and helps boost productivity. Use the practical Sprout space divider, which lets you grow suitable plants right inside it.

Sprout is ideal for making any space more visually appealing and cosy. Use it to define work areas or leave it in communal spaces for flexible use – Sprout's wheels make it easy to move it around. Sprout is precisely sized to fit between two opposite-facing desks, covering the full span of both workstations and providing privacy. It comes in two heights with three different top surfaces. The fabric-covered exterior adds character and improves room acoustics.

DIFFERENT SURFACES

NARROW SURFACE

The most compact option. With minimal surface space around the planting area, this version is perfect for use in narrow corridors and passageways.

EXTENDED SURFACE

The medium-width surface surrounding the planting area is complemented by an extra surface. It can be used for seating or storing work equipment. Suitable for both open areas and between desks.

MEDIUM-WIDTH SURFACE

The planting area is bordered by a medium-width surface – ideal for resting small items like a coffee cup. Suitable for placement in the centre of a room, where it creates visual separation.
